MULTI-PURPOSE MOUNTING STAND

- 2" black powder coated steel tube for unparalleled strength & stability - superior to cast iron, which is soft & brittle
- Mounting plate is bolted to tube for easy change of accessory plates
- Universal openings in mounting plate accommodate a variety of accessories:
 - Automatic or touchless sanitizer dispensers
 - Hostess signs
 - Menu boards
 - Letter boards
 - Possibilities are endless!
- Configurable with:
 - 18" steel triangular base
- Easy three-piece construction for quick assembly
- Oak Street uses short bolts to screw into a welded anchor plate to secure base & plate to tube - this is a much improved method than competitors, which use a long rod that torques & stretches when force is applied - making the base permanently loose from the tube
- Part #: MPMS-18-TRIANGLE
- F.O.B. Iowa
