## BLACK STAMPED STEEL DISC BASES

TUBE BOTTOM (BOTTOM)

Welded anchor plate at bottom of tube.  
Anchor plate also has a welded nut on back of anchor plate.

SPIDER / TUBE TOP (SIDE)

SPIDER (TOP)

TUBE BOTTOM (SIDE)

Oak Street uses a short bolt to screw into the welded anchor plate. This is a much improved method than the competitors, which use a long rod that will torque & stretch when force is applied - making it permanently loose.

Our bolt also has both a lock washer & a flat washer. The flat washer keeps the lock washer from catching on the anchor plate, preventing the bolt from becoming loose.

BASE (TOP)

Stamped Steel base - most competitors use cast iron bases, which is a soft & brittle metal.

BASE (BOTTOM)

Welded glide tabs with hollow back - not possible with cast iron bases - drastically reduce the chances of having a bad tab for glides.

BASE SIZE	PART NUMBER
